## EDUCATION

### Full Stack Web Development

Masai, Bengluru  
January 2024-present

### HSC

Thakur College of Science & Commerce  
August 2016 - May 2018

### Bachelor of Science in Information Technology

Mumbai University  
August 2018 - June 2021

## TECHNICAL SKILLS

Wordpress | PHP | Java | SQL | MongoDB | bootstrap | Git | JavaScript | Responsive Web Design | CSS3 | HTML5 | Express.js | Node.js | React

## SOFT SKILLS

Problem Solving | Teamwork | Time Management

# Deepak Maurya

## Full Stack Web Developer

### PROFESSIONAL SUMMARY

Enterprising Full Stack Web Developer with proficiency in the MERN stack, including Node.js, Express.js, React.js, and MongoDB. Excel in RESTful API design, efficient database querying, and seamless frontend-backend integration. Capable of leveraging Generative AI and swiftly adapting to new technologies.

### WORK EXPERIENCE

#### Fiverr

Freelancer  
February 2021 - December 2023

#### Job responsibilities:

- Collaborated with clients to gather requirements and translated them into functional web applications using the MERN stack, ensuring alignment with client expectations and industry standards.
- Designed and developed efficient server-side APIs using Node.js and Express.js, and integrated them seamlessly with React.js frontend components for optimal performance.
- Created, optimized, and maintained MongoDB database models and queries, ensuring data integrity and enhancing overall application efficiency.

### PROJECTS

#### 1. Lean & Lift | 🌐 | 📱

React | Redux | Git | RESTful APIs | HTML5 | CSS3 | Responsive Web Design | chakraUI

- Designed and developed a holistic health management platform using React and Redux.
- Implemented user authentication, physical activity tracking, and nutrition management features.
- Created a mental wellness module with mindfulness exercises, meditation guides, and stress-relief activities.
- Utilized responsive web design to ensure seamless user experience across various devices.

#### 2. Alogrithm Visualizer | 🌐 | 📱

JavaScript | Git | HTML5 | CSS3 | Responsive Web Design | Bootstrap

- Developed interactive, animated visualizations to illustrate algorithm processes using JavaScript.
- Ensured cross-device compatibility by implementing responsive web design principles.
- Collaborated with a team of three to integrate multiple sorting algorithms with customizable parameters.
- Utilized Git for version control and collaborative development.
- Optimized the user interface for seamless and intuitive user interactions.
